EDUCATION

State University of Maranhão

Bachelor of Engineering in Computer Engineering

São Luís, MA

2016 – 2021

EXPERIENCE

Systems Development Supervisor

Sep. 2022 – Present

State Court of Accounts (TCE-MA)

São Luís, MA

- Leading the technical transition from legacy monolithic systems to **Clean Architecture (Ports & Adapters)**, improving code maintainability and decoupling business logic.
- Architecting and securing RESTful APIs using **Spring Boot 3** and **Spring Security**, implementing **JWT** and **RBAC** to protect sensitive fiscal data from all municipalities in the State.
- Developed a high-performance system for receiving and processing fiscal information, ensuring data integrity for state-level oversight.
- Engineered a staff performance monitoring platform, implementing complex business rules and modern reactive interfaces with **Vue.js 3 (Composition API)**.
- Mentoring the development team on best practices, including **TDD**, **Integration Testing (Testcontainers)**, and Git Flow.

Frontend Developer

Jan. 2022 – Sep. 2022

State Secretary of Transparency and Control (STC-MA)

São Luís, MA

- Developed custom web applications using **JavaScript (ES6+)** and modern CSS frameworks, focusing on mobile responsiveness and UX/UI design.
- Implemented web accessibility (a11y) standards to ensure applications were usable for people with disabilities.
- Collaborated with UI/UX designers to translate Figma mockups into functional, high-performance frontend components.

KEY PROJECTS

Fiscal Data Gateway | *Java, Spring Boot, PostgreSQL, Docker*

2023

- Contributed to the development and maintenance of the backend for the fiscal data ingestion system, handling information from over 200 municipalities.
- Enhanced system reliability by refactoring critical modules.

Internal Performance Tracker | *Vue.js 3, TypeScript, Spring Boot*

2024

- Integrated complex RBAC layers to manage different levels of institutional access and evaluation roles.
- Automated the complex institutional and individual performance evaluation processes, eliminating manual reporting through real-time dashboard visualizations.

TECHNICAL SKILLS

Languages: Java 17+, SQL (PostgreSQL, MySQL), TypeScript, JavaScript (ES6+), HTML5, CSS3

Frameworks: Spring Boot 3, Spring Security, Spring Data JPA, Vue.js 3, Hibernate

Developer Tools: Docker, Git, Linux, Flyway, Maven, CI/CD, IntelliJ, VS Code

Architecture & Testing: Clean Architecture, TDD, Integration Testing (Testcontainers), JUnit 5, Mockito, REST APIs

Languages: Portuguese (Native), English (Professional Working Proficiency)
